PROFILE SUMMARY

Computer Science graduate with hands-on experience in data analysis, machine learning, and research-driven software development, skilled in building automated pipelines and predictive models.

TECHNICAL SKILLS AND INTERESTS

Languages: C++, Python, R, JavaScript, HTML, CSS
Libraries/Frameworks: Pandas, NumPy, tidyverse, tidymass, OpenPyXL, python-pptx
Tools: VS Code, Git, GitHub, Jupyter Notebook, RStudio, Advanced Excel, Power BI
Cloud/Databases: SQL, PostgreSQL
Areas of Interest: Data Science and Analysis, Machine Learning, Web Design and Development
Soft Skills: Problem Solving, Self-learning, Presentation, Adaptability

EXPERIENCE

- Technical Assistant - Data Analyst (Data Science)**

THSTI (Translational Health Science and Technology Institute)

Jan 2026 – Present

On-site

- Building automated data analysis pipelines in R using tidymass and tidyverse for metabolomics research workflows.
 - Developing machine learning models in Python for predictive analytics and pattern recognition in biological datasets.
 - Creating front-end GUI applications to streamline data processing and visualization for research teams.
 - Technologies: Python, R, tidymass, tidyverse, machine learning frameworks, GUI development.
- CX Associate C02 (Promoted to C03)**

Conduent

Feb 2025 – Jul 2025

On-site

- Delivered end-to-end client support for US and European customers—coordinating with cross-functional teams, meeting strict SLAs, and achieving promotion to C03 for consistent performance.
 - Provided data analysis and visualization insights to support operational reporting, enabling data-driven decisions across customer service workflows.
- Software Developer Intern**

OpenText

Oct 2023 – Apr 2024

On-site

- Developed an automated data-conversion tool in Python, reducing manual effort by **75%**.
 - Converted Excel datasets into structured PDF reports using Pandas and OpenPyXL, improving reporting efficiency.
 - Enhanced cross-departmental communication by presenting insights through clear, data-driven PowerPoint summaries.
 - Technologies: Python, Pandas, OpenPyXL, OS, python-pptx.

PERSONAL PROJECTS

- Movie Rental Store Analysis – View GitHub Repository**

Power BI dashboard for the Sakila DVD Rental Store database

- Built an interactive Power BI dashboard analyzing customer rental behavior, film performance, and store-level revenue.
 - Used SQL-based data modeling on the Sakila database with filters for customer segments, film categories, and staff performance.
 - Delivered actionable insights on rental trends, top-performing films, and staff productivity metrics to optimize store operations.
- Customer Shopping Behavior Analysis – View GitHub Repository**

End-to-end analysis of customer purchasing patterns

- Analyzed 3,900+ customer transactions using Python, SQL, Excel, and Power BI with data cleaning and feature engineering.
 - Integrated PostgreSQL to uncover spending patterns, product preferences, customer segments, revenue trends, and discount utilization.
 - Created interactive dashboards and visualizations to identify high-value customer segments and inform marketing strategies.
- Northwind Sales Analysis Dashboard – View GitHub Repository**

Power BI dashboard for Northwind Traders business insights

- Developed an interactive Power BI dashboard to analyze sales performance, customer behavior, and operational efficiency using the Northwind dataset.
 - Identified key insights on revenue trends, top-performing products, and high-value customer segments to support data-driven decision-making.
 - Implemented dynamic filters, slicers, and drill-down features to enhance usability and enable deeper exploration of business metrics.

EDUCATION

- Bachelor of Engineering in Computer Science and Engineering (CSE)**

Chitkara University

Aug 2020 – Aug 2024

9.56 CGPA

- Relevant Coursework: Data Structures, Algorithms, Operating Systems, DBMS, Object-Oriented Programming, Computer Networks.
 - Professional Training: AccioJobs Data Science Program (June 2025 – January 2026).
